Lodel Installation

PHP Extensions Check

```
PHP Version 7.0.23-1+0~20170902060934.6+stretch~1.gbpa985da: OK
mbstring: OK
xml: OK
gd: OK
curl: OK
mysqlnd: OK
zip: OK
```

Completed

Config File

```
/**
```

Completed

Install key file

Completed

DB Connection

Completed

Tables Creation

Completed

Texts Insertion

Completed

SuperAdmin Creation

Completed

```
Username: admin
Password: aeGhaivaich3Cu1
```

Lodel is now installed, copy the SuperAdmin account parameters above somewhere and log here: [User Creation](#) to creat

After that you should:

1. Log in with your new account and delete the automatically created one;

2. delete the key file in order to prevent this installation script to be run;

3. create your first site via the general admin interface.
